

Natural & Organic as defined by Sun Gro...

Many Sun Gro products are considered “Natural & Organic”.

“Organic” Products

Organic products are defined by Sun Gro[†] as ingredients that are carbon based, were once alive and are without the addition of synthetic chemicals. Some examples are peat moss, bark, organic fertilizers and organic wetting agents.

“Natural” Products

Other components such as perlite, vermiculite, gypsum, limestone and RESILIENCE™ silicon are defined as “Natural” which means they are not carbon based but they are obtained from natural deposits and processed without the use of synthetic chemicals – these materials are mined, ground up and screened, and expanded in the case of vermiculite and perlite.

[†] For more information about regulatory definitions go to www.aapfco.org and/or your individual state Department of Agriculture. These definitions may or may not be acceptable in the state of California.

Many Sun Gro products are OMRI listed and are acceptable as USDA NOP input material. OMRI is a 501(c) (3) non-profit organization founded in 1997. OMRI provides professional, independent, and transparent review of materials and processes to determine their suitability for producing, processing, and handling organic food and fiber. OMRI Listed® products have been reviewed by OMRI and determined to be in compliance with the USDA National Organic Program standards and may be used in an organic growing system. More information about OMRI can be found on their website at www.omri.org

Sun Gro Professional and Retail Product catalogs and web product listings list our mix ingredients. For more information, go to www.sungro.com or contact your local Technical Specialist at <http://www.sungro.com/contact-us>
